# 2022 Leadership Reset Series

## Workshop #1

Mark Strom 28 June 2022

Lead with Wisdom in These Times

### Internationally Renowned

Mark has consulted to corporations and government bodies on systems thinking, cultural change, learning and leadership. He played a significant role in the renewal of some public schools. Thousands of leaders have heard his keynote addresses or participated in his leadership seminars in Australia, New Zealand, Singapore, Belgium, Canada and the USA.

## **Dr Mark Strom**

Mark Strom is all about leadership. Mark has spent a long time learning how good leaders become great leaders and he's willing to share his learning with us during the first Leadership Reset 2022 workshop.

Mark has a rare gift for sparking and animating new conversations. He loves life-giving ideas. He has more than 30 years of extensive high-level experience speaking and leading workshops. He has spoken to global leading firms such as McKinsey & Company and at the Harvard Club (Brussels) and TEDx (Geneva).

Unlocking passion, creativity and intelligence is increasingly understood as the key to success. A people-centred economy is emerging and its currency is meaning. These vital areas necessitate a richer framework of leadership.

Mark Strom finds this framework in wisdom drawing on a rich array of ideas from history. His gift is making these ideas accessible. Mark believes it is wisdom that helps us see every situation as a learning context, nurture a design culture and reputation, execute the hardest decisions with dignity, and gain the respect and commitment of people.

At the heart of Mark's work and talk is a powerfully simple idea: Leadership needs Wisdom.

Leadership is the human capacity to touch another's life, to change the world. It takes place in the complex human patterns of language, intent, and meaning. Thus we need to read these patterns (and more) well, discerning which are relevant and helpful, and acting with intent, integrity and care. The ancients called this wisdom.

This is the era when solving the greatest social, ecological, and human challenge is here and now – no longer a distant future. Senior leaders must confront hard truths and prepare for what is to come next.

Our experts will lead you to think about:

- Trends, emerging issues, as well as potential shocks, threats, and innovations.
- Taking leadership to a new place: outside the building to improve our world.
- The issues of accountability, ethics and integrity.
- The inter-relatedness of socio-economic systems and the need for those with power and influence to collaborate across boundaries.
- Business as a force for good: building an equitable, inclusive and regenerative economy.
- The art of caring leadership in action.
- Understanding post-normal environments and preparing for what is coming.
- The lessons learnt about how to lead through prolonged uncertainty and crisis.

Six exceptional workshops are available between 28 June and 22 November 2022.
