

ALLIANCE FOR
LEADERSHIP LEARNING
leaders matter

Executive Challenge Academy -Alliance for Leadership Learning statement in response to Christchurch.

As leaders of public and community sector organisations in Queensland we join with others in the community to express our deep compassion and sorrow for all those who have suffered due to the Christchurch terrorist attack. We stand together with the families of victims and the people of New Zealand. We recognise the grief, fear and anger of Muslim communities around the country and the world and abhor the ideologies of hate that lately have gained currency. This is contributing to disharmony and eroding our vision for an inclusive, diverse and socially cohesive country and world.

We will support those who do the important work of welcoming new Queenslanders and at this time do everything in our power to ensure leaders everywhere contribute to creating safety and belonging for those who feel they are not safe and that they are not welcome.

We join with others working for inclusion, on behalf of our community, and as public and community sector leaders to hold ourselves and our organisations accountable for realising our collective vision of social cohesion, inclusion, diversity and belonging.
